ONE

Your companion Throughout the Entire Flight

LAGARY

About Us

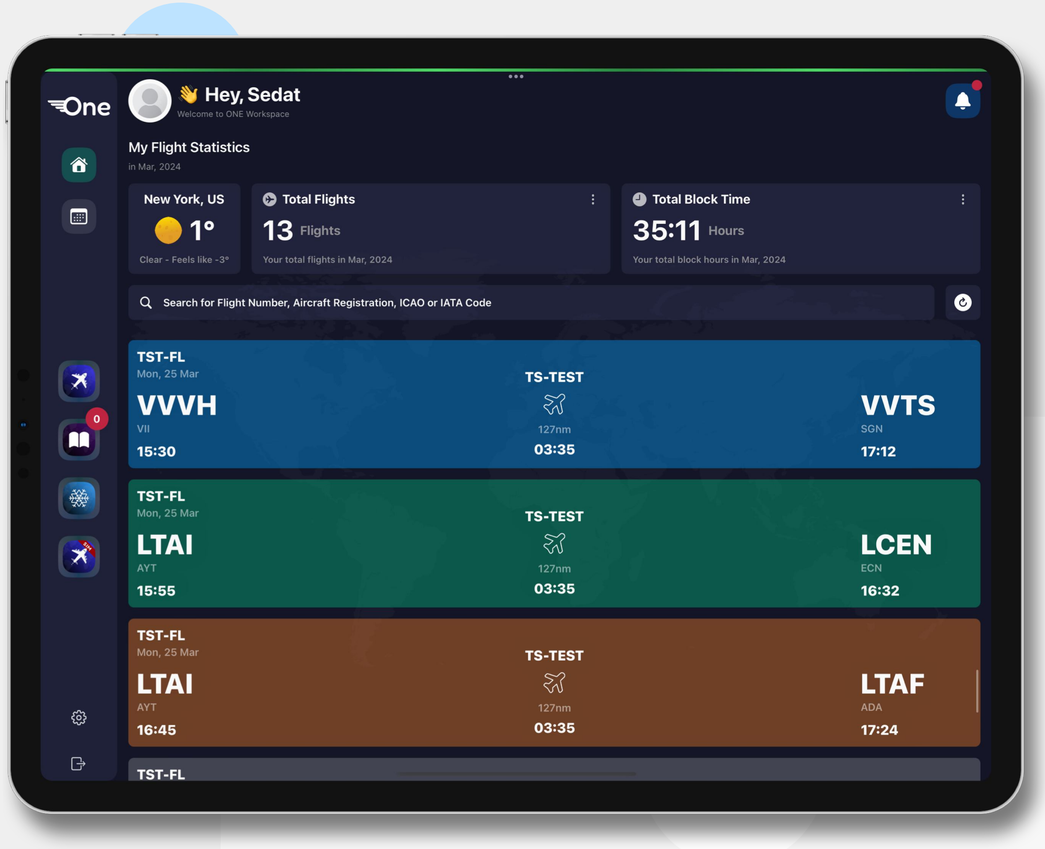
Who we are, what we do

Lagary creates a virtual office called ONE, allowing customers to access its global flight operations via single online flight portal. Its user friendly design allows interaction and sharing all dispatch data, and journey log by enabling integration and centralization of Information generated by other core systems.

ONE

Simplify, Integrate, and Manage with ONE

Access all your essential aviation applications like NavOne, DocuOne, ONE Forms, and HOTs with a single sign-on. ONE makes managing your flight operations effortless.



About ONE

1

Single Sign-On

Access multiple aviation applications without the hassle of multiple logins. ONE simplifies your workflow and saves you time.

2

Daily Flight Plans

Stay up-to-date with the latest flight plans, all accessible within the app.

3

Flight History Overview

Keep a detailed record of your flights, past and upcoming, to better plan and review your journey.

4

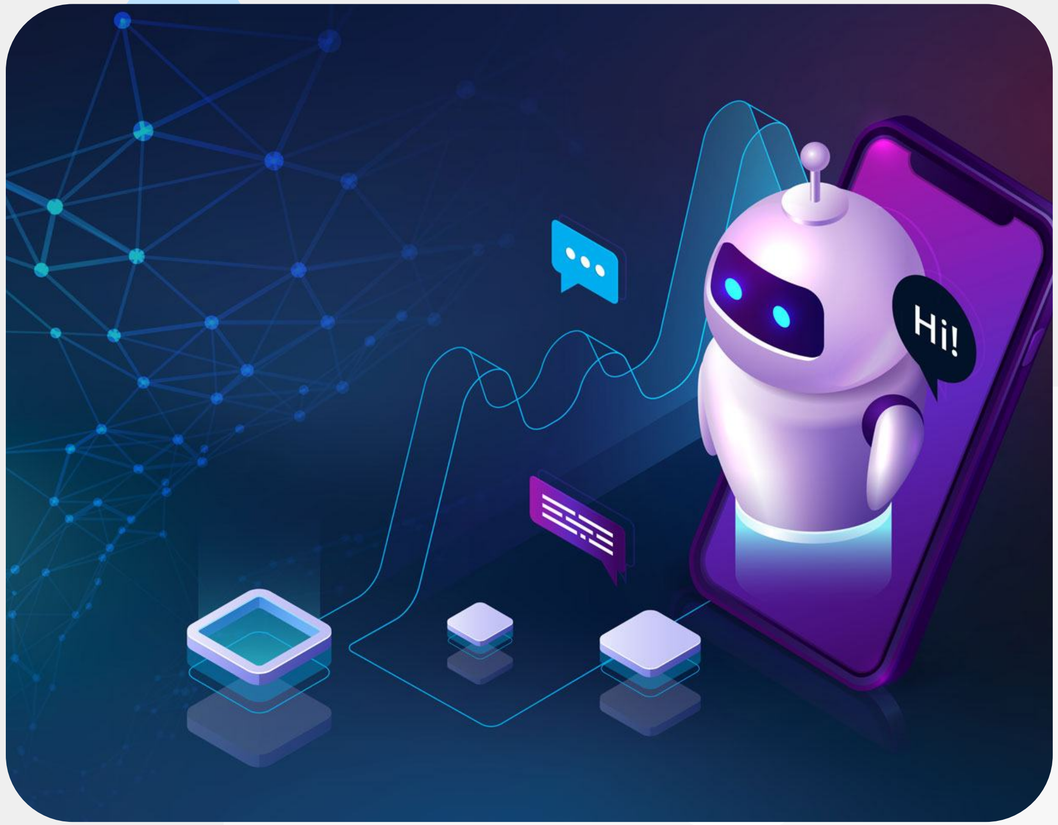
Secure and Reliable

Built with the highest standards of security to protect your data and ensure seamless operation.

CPT Mayk

Your Intelligent Aviation Assistant

Your smartest assistant for flight and document analysis. Optimize every detail, from fuel savings to safety, with advanced insights and stay ahead with intelligent recommendations.



About CPT Mayk

1

Flight Analysis

More than just document analysis, CPT Mayk can evaluate an entire flight. From takeoff to landing, it identifies key points, offers fuel-saving tips, and ensures you're aware of all critical flight details.

2

Document Analysis

CPT Mayk reads and analyzes aviation documents, providing precise and insightful responses based on the content. Whether it's regulations, procedures, or technical manuals, CPT Mayk helps you navigate complex information with ease.

3

Proactive Recommendations

CPT Mayk doesn't just provide information; it offers actionable advice. Whether it's optimizing fuel consumption or highlighting crucial flight data, CPT Mayk ensures you have the knowledge to make informed decisions.

4

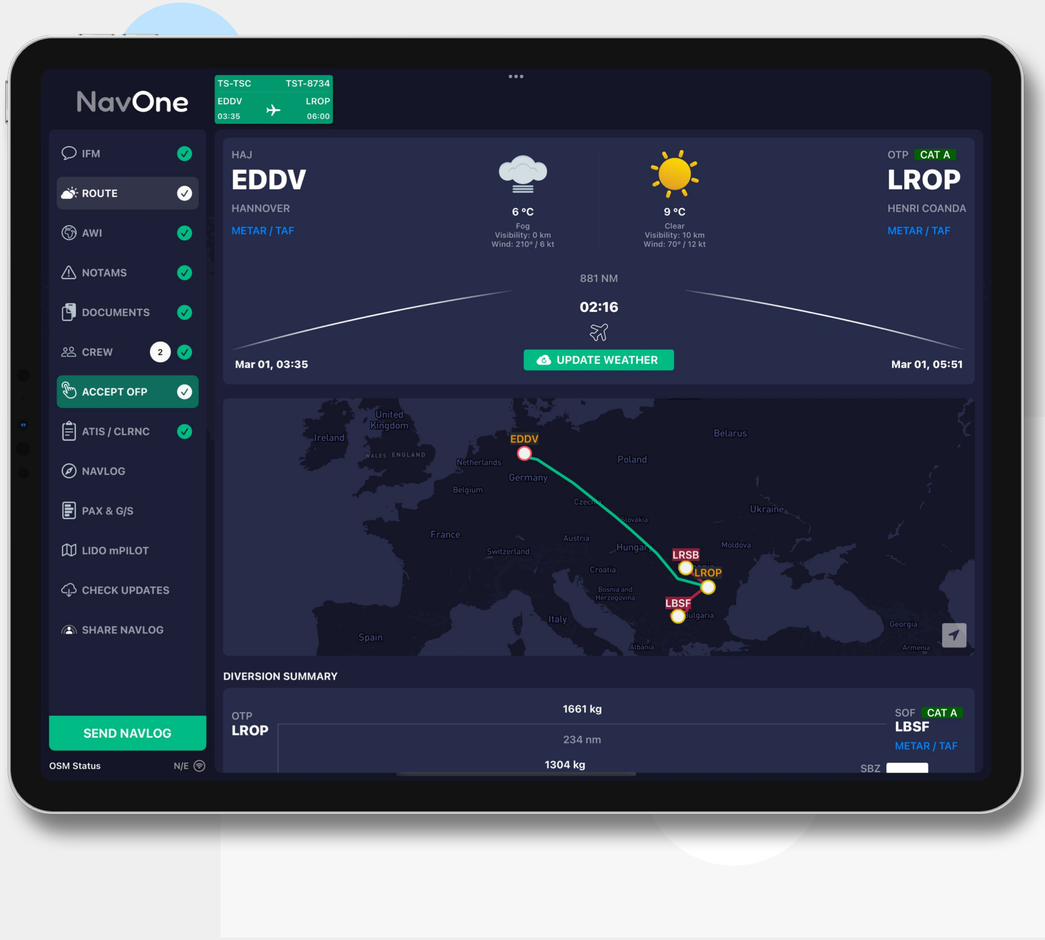
Continuous Learning

Built with advanced AI capabilities, CPT Mayk learns from every interaction, becoming more accurate and effective with each use.

NavOne

Your Companion Throughout the Entire Flight!

The Electronic Flight Folder system simplifies the pilot's tasks and prevents errors in data entry.



About NavOne

1

All Your Flight Data in One Place

Access crucial flight information such as flight plan, journey log, NOTAM, METAR, TAF, and weather details from a single source.

2

Comprehensive Weather Information

Instantly view METAR and TAF reports along with weather forecasts, ensuring your flight is always planned with the most up-to-date information.

3

Easy to Use

Optimized for iOS with a user-friendly interface, allowing you to easily access all your data.

4

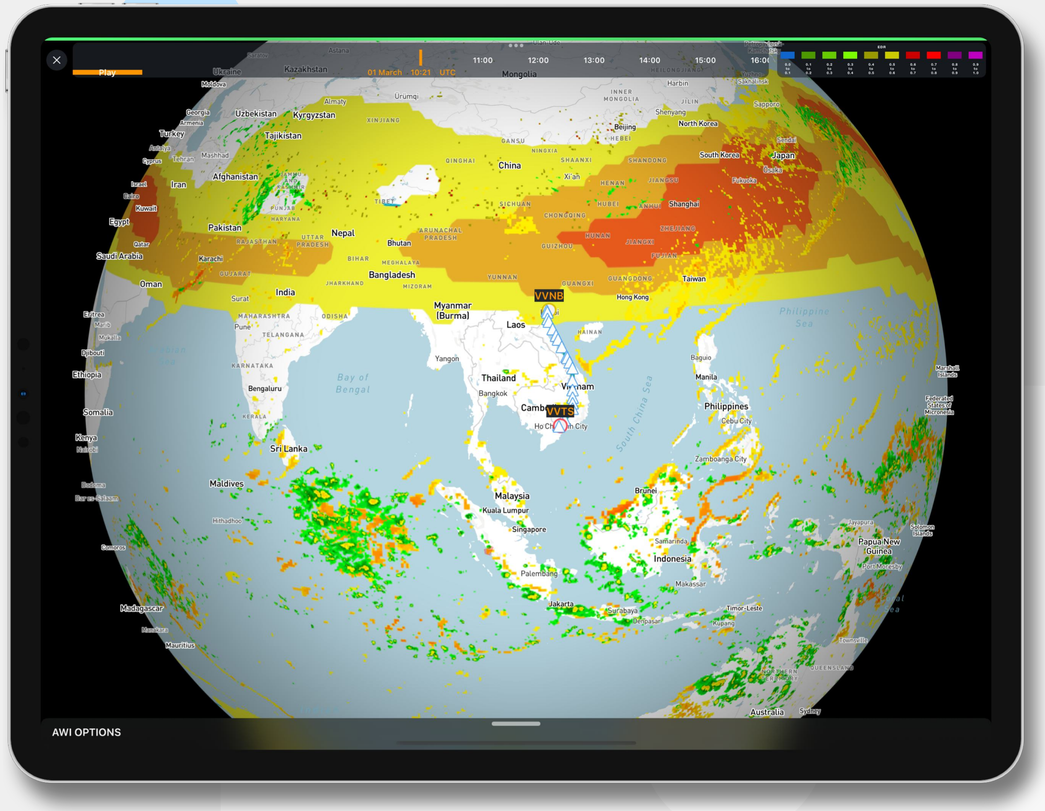
Time-Saving

All the documents and reports you need from pre-flight to post-flight are at your fingertips.

AWI

All Weather Information

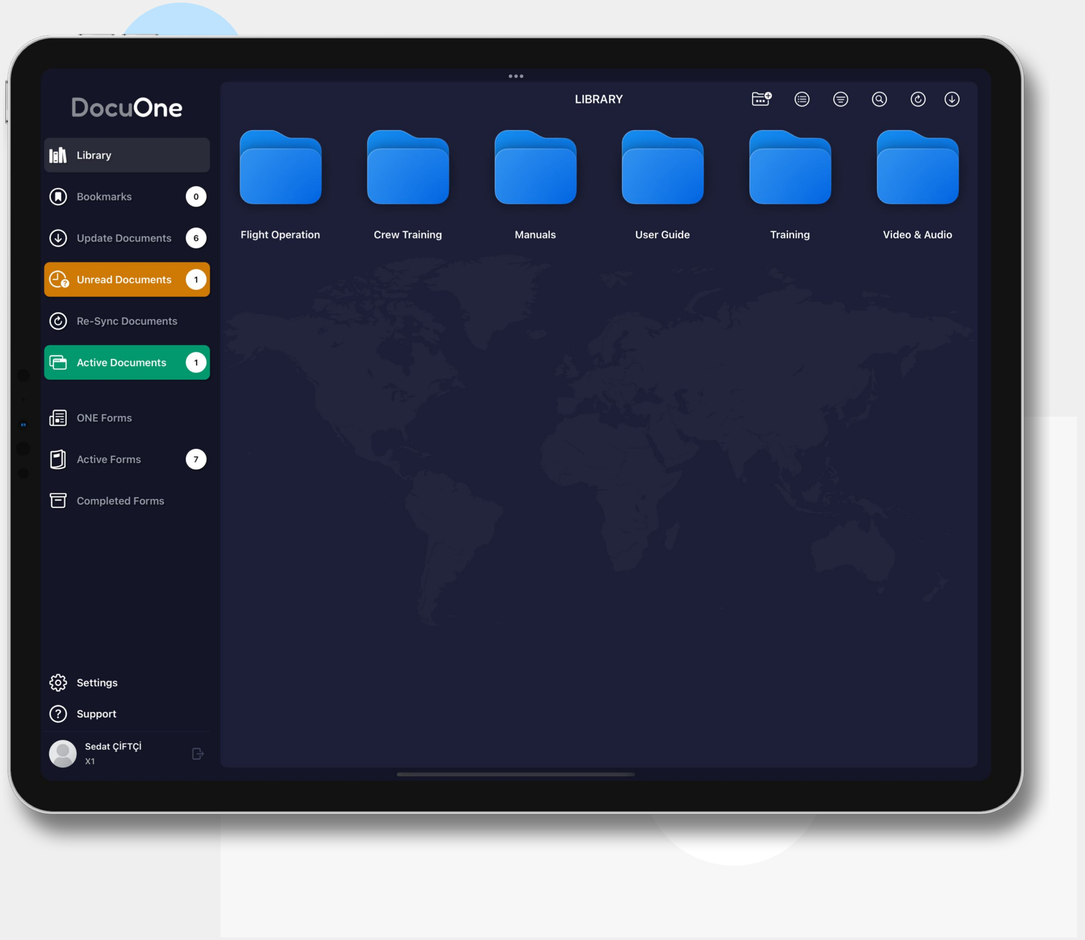
As an extra feature in NavONE, AWI displays live weather data sourced from top weather-data provider companies.



DocuOne

Your Comprehensive Document Management System

Manage all your aviation documents in one place. DocuOne allows your company to store, organize, and access crucial documents securely and efficiently.



About DocuOne

1

Complete Document Control

Manage all your aviation documents in one place. DocuOne allows your company to store, organize, and access crucial documents securely and efficiently.

2

Easy Access for Staff

Empower your staff with easy access to all necessary documents. Whether in the office or on the go, your team can view and interact with documents whenever needed.

3

User Reports

Monitor which users have accessed and read specific documents. Generate detailed reports to ensure compliance and accountability across your organization.

4

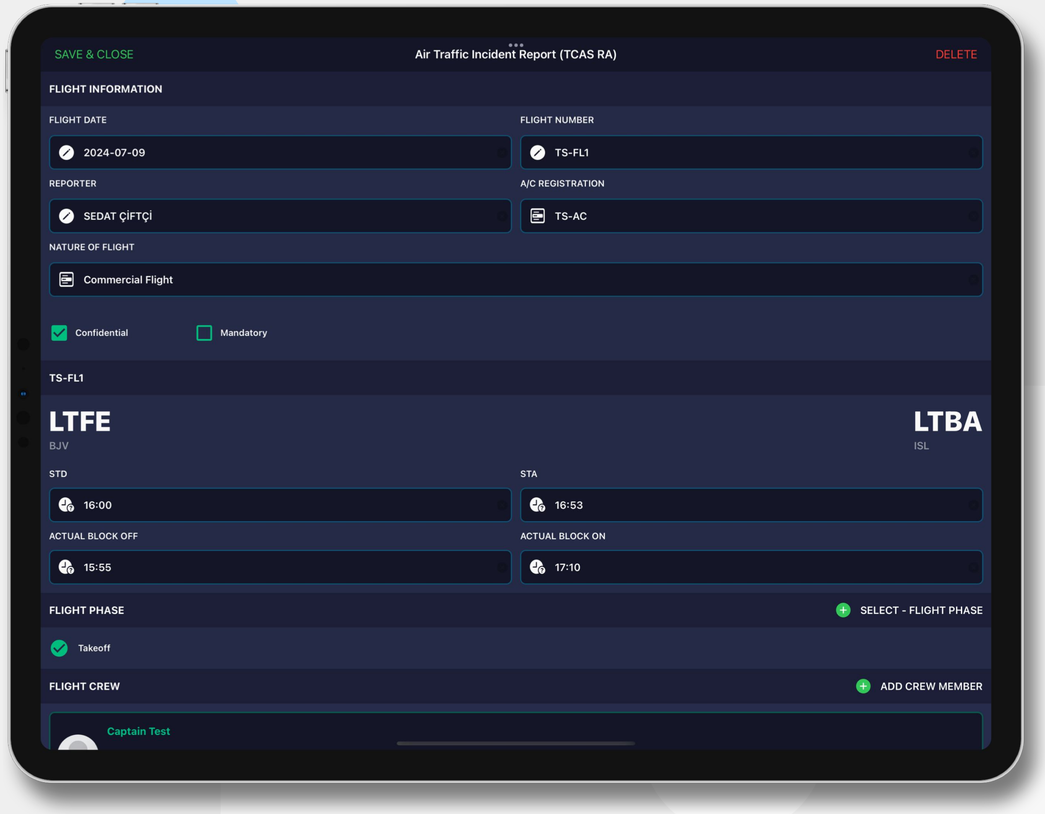
Workflow Integration

Streamline your document-related workflows by integrating them directly into your operations, ensuring that every document is where it needs to be, when it needs to be there.

ONE Forms

Digitize Your Aviation Paperwork

Say goodbye to paper forms. OneForms converts all your aviation-related paperwork into digital format, streamlining your operations and reducing manual errors.



About ONE Forms

1

Complete Digitization

Say goodbye to paper forms. OneForms converts all your aviation-related paperwork into digital format, streamlining your operations and reducing manual errors.

2

Custom Form Creation

Tailor forms to your specific needs. With OneForms, you can create custom digital forms that suit your organization's unique requirements.

3

Efficient Data Management

Collect, store, and manage data more efficiently with digital forms. Simplify the process of filling out, submitting, and processing forms, making your workflow faster and more reliable.

4

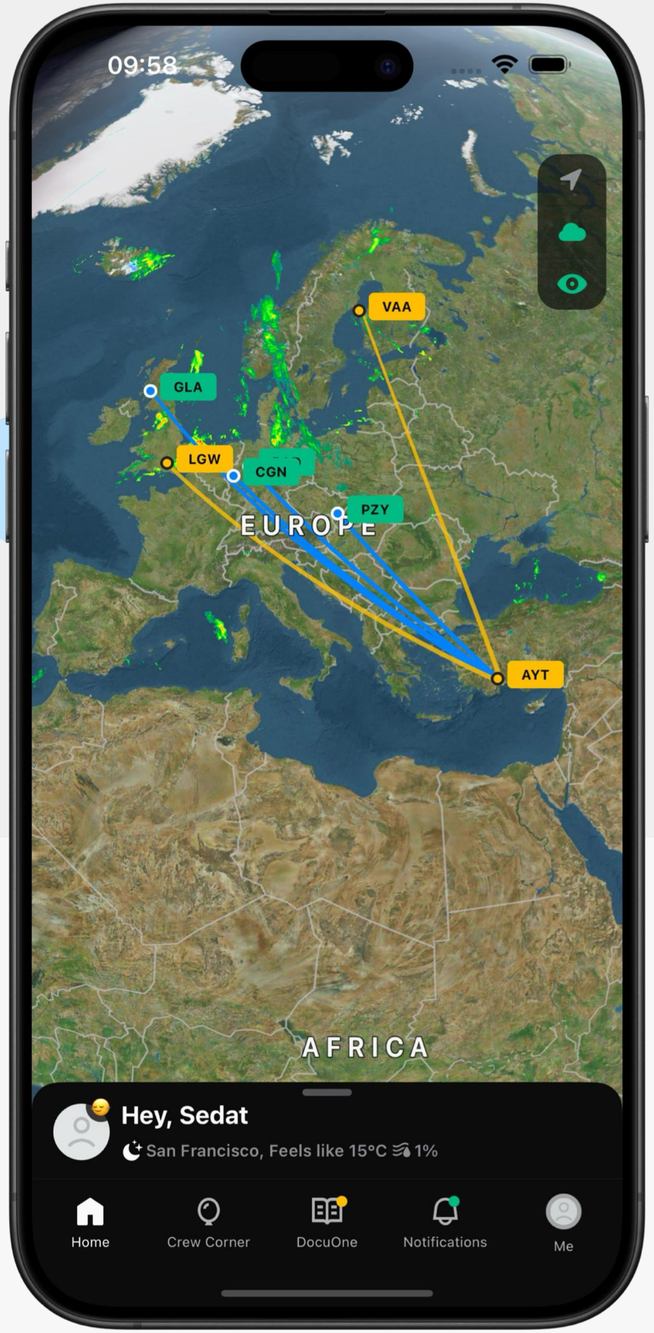
Eco-Friendly Solution

Reduce your carbon footprint by minimizing paper use and contributing to a more sustainable aviation industry.

Me.

Simplify, Track, and Connect

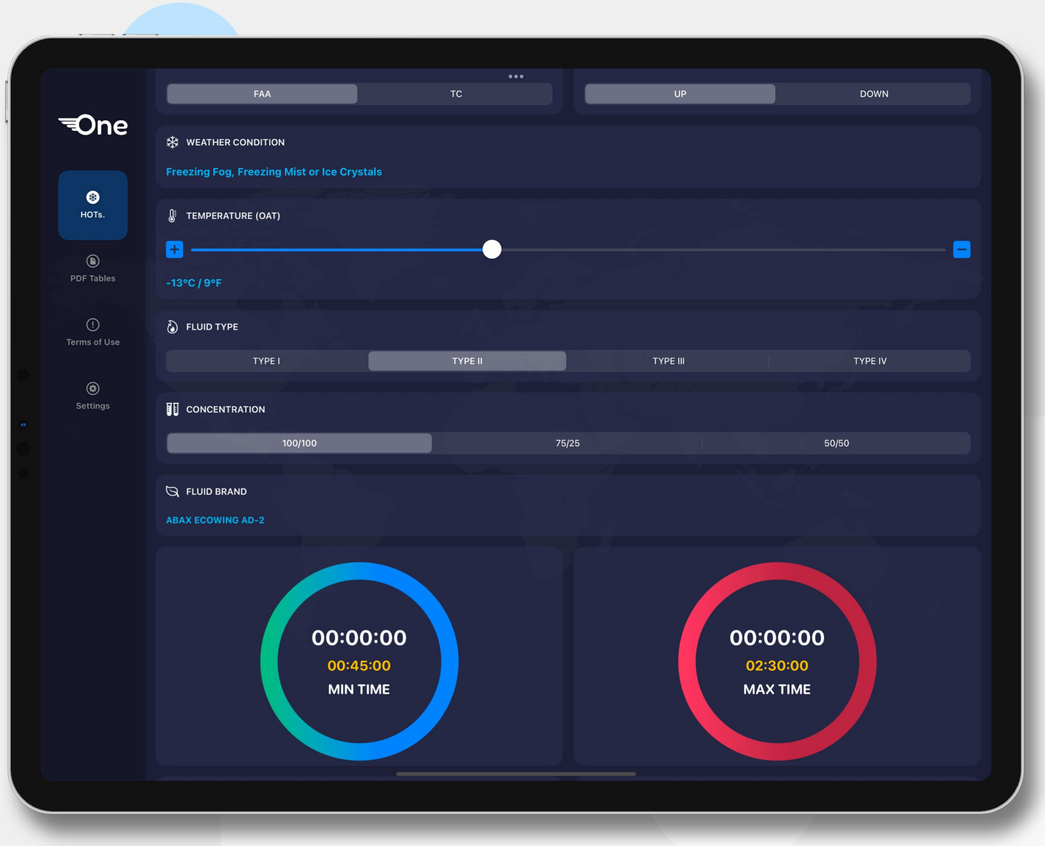
Me is an all-in-one application that allows crew members to track their rosters, total flights, and flight times efficiently. Through the integrated DocuOne module, users can easily access and read essential documents.



HOTs.

Holdover Time Calculator

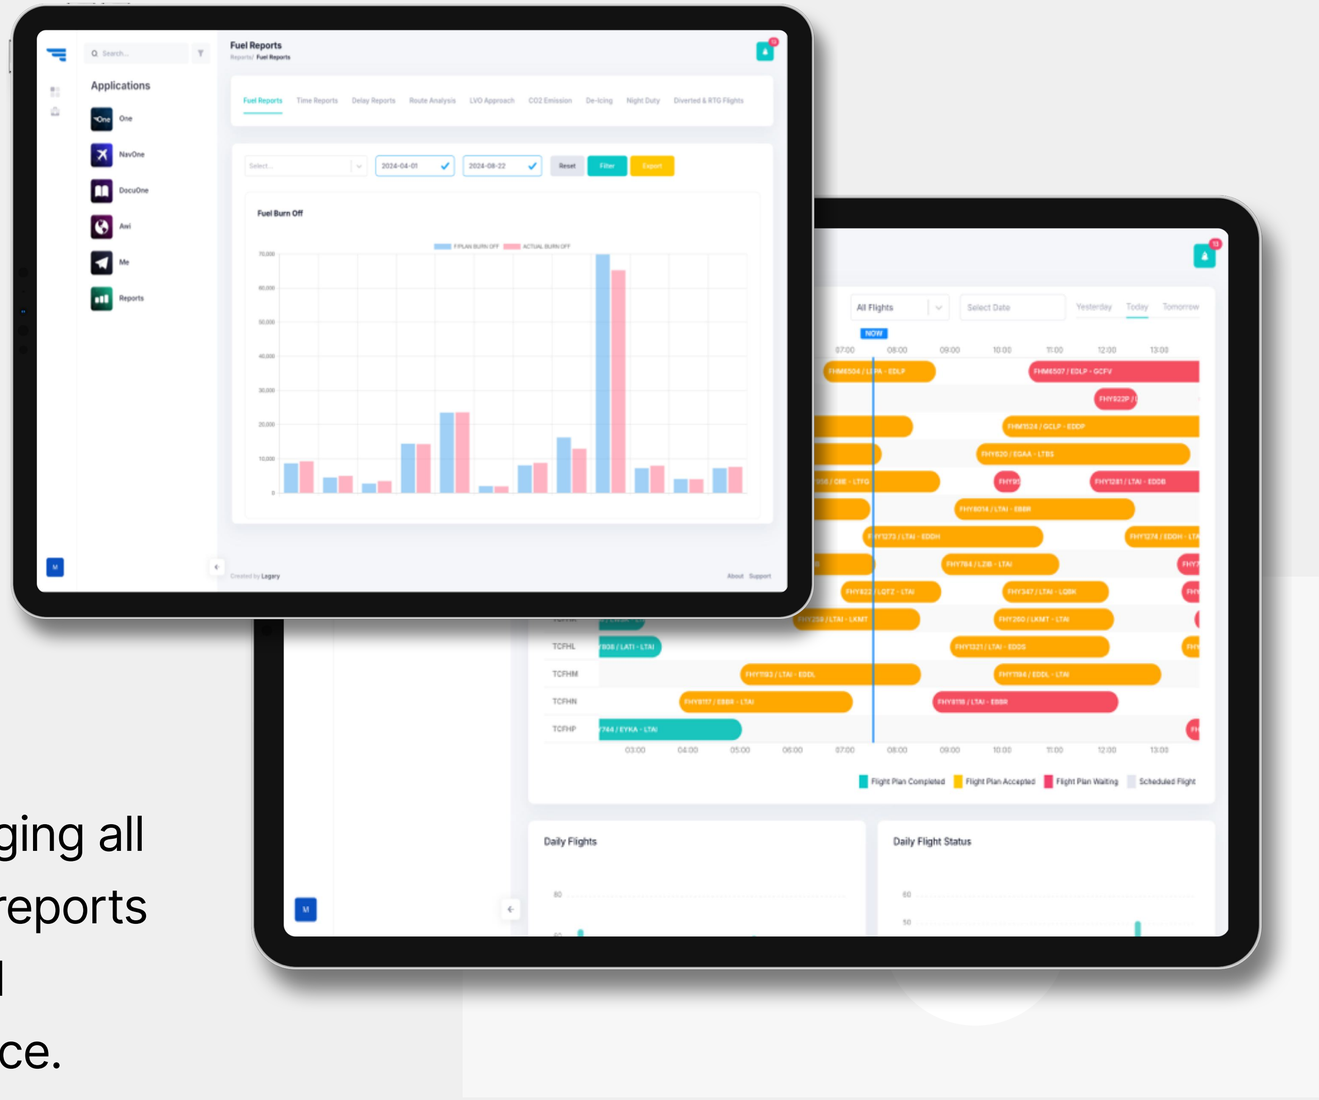
HOTs is designed to calculate de-icing holdover times with precision, ensuring compliance with FAA and TC regulations. This application helps your team manage de-icing processes effectively, minimizing delays and maintaining safety standards.



ONE WS.

Your Centralized Aviation Management Workspace

One Workspace is your go-to platform for managing all aspects of your aviation operations. From flight reports and crew management to document control and aircraft status, everything you need is in one place.



About ONE WS.

1

Centralized Platform

One Workspace centralizes flight reports, crew reports, and aircraft status into a single platform, providing complete control over your aviation operations. Every detail, from flight operations to crew assignments, is easily accessible, ensuring smooth and efficient management.

2

Powerful Reporting Tools

In aviation, accurate and timely reporting is critical, and One Workspace excels in this area with advanced tools for generating detailed flight, crew, and aircraft reports. These tools not only help you track performance and compliance but also provide insights that drive decision-making, enabling your team to optimize operations and maintain the highest standards.

3

Document Management

One Workspace offers real-time access to crucial data and documents, making it easier to manage and update essential information instantly. With integrated document management, your team can efficiently handle all necessary paperwork, ensuring everything is up-to-date and accessible whenever needed.

4

Carbon Emission Reporting

Sustainability is at the core of One Workspace, featuring a cutting-edge carbon emission reporting tool. This feature empowers your organization to track, analyze, and reduce its environmental impact, aligning with industry regulations and helping you contribute to a greener future.
